

LÜTTJE LAGE

When you pour the liquid do observe the measuring line. Do not pour too much liquid into the glasses (especially the Schnappsglass) otherwise you will spill the drink.

Take the beerglass into your hand and put all fingers to the glass.

Leave about a fingerwidth of space to the top of the glass

(this will work no matter how big or small your fingers are).

Push the middle finger out.

(All other fingers remain attached to the glass)

Put the Schnapps-/Shotglass between your middle finger and your ring finger.

The ring finger is between the two glasses and sits on top of the foot of the Schappsglass.

Now adjust the Schnappsglass to be about 5 mm above the Beerglass.

Use your ring finger to push the stem of the Schnappsglass so that the top touches the Beerglass!

(Important: the two glasses must touch so that the Schnapps can flow from the Schnappsglass into the Beerglass)

Stand Straight (Important: do not lean forward in fear of spilling the drink) !

- Drink exactly opposite the Schnappsglass allowing the Schnapps to flow directly into the beerglass

- Drink speedy, but not hastily!
- Head held high and when you drink look into the sky / to the ceiling.

Important: do not tilt the glasses (like drinking beer or wine) but knock your head back!

PROST !
